GARMENT PRINTERS

Anajet Inc.

Brother International Corp.

**Brother® GT-541
Digital Garment Printer**

Perfect for the start-up or expanding garment decorating business, the Brother GT-541 printer can increase sales and generate new profit opportunities. Print-on-demand directly from a computer without the set-up mess and high cost of traditional screen-printing. The clean working GT-541 is as easy to install and operate as a desktop printer, bringing simplicity and flexibility to your garment and fabric decorating services.

**brother®

**Brother® GT-782
Digital Garment Printer**

The larger Brother GT-782 white ink-capable garment printer is perfect for mid to high-volume operations and serves a variety of small-lot production jobs cost effectively. With a wide color gamut and dual independently controlled platens, the GT-782 prints on dark colors quickly and reliably. Its unique ability to print multiple items simultaneously means production will increase with reduced cycle times and fast downloading of new images.

Melco Industries Inc.

MelcoJet

Adding direct to garment printing to your business may be one of the best decisions you ever make.

MelcoJet technology is an alternative solution to screen printing. MelcoJet printing is fast, environmentally friendly and prints high-quality images on light or dark garments. When it's time to bring t-shirt printing in-house, MelcoJet is THE investment, perfect for single print orders, short print runs, and point of purchase sales. With an outstanding return on investment, you can add a new dimension of profitability to your business!
