

Sourcing Guide **index**

We hope this special issue of *Stitches*, the 2010-2011 Embroiderers Sourcing Guide, will act as a version of the Yellow Pages, designed to help you find the suppliers, products and services you need. To track down a specific type of wearable, machine, embroidery supply or service, start by checking here, in the Sourcing Guide Index. This index will tell you what page the

product/service category you're looking for appears on, and once you turn to that page you'll find a list of suppliers for that particular product or service. Once you select some suppliers you'd like to learn more about, flip back to the alphabetical company listings section starting on page 63 to find contact information for those suppliers.
